Description:	Provides a title prefix search suggestion backend		
State:	stable	Dependency:	MediaWiki
Developer:	Brion Vibber	License:	-
Type:	MediaWiki	Category:	Infrastructure
Edition:	BlueSpice free, BlueSpice pro		
For more info, visit Mediawiki .			

Features

Title prefix search suggestion backend

This extension provides no benefit if you are using [CirrusSearch](#).^[1]

The **TitleKey** extension provides a case-insensitive title prefix search. It uses a separate table for the keys, so if it works cleanly it can be deployed without an expensive rebuild of core tables, and dumped when Wikimedia gets a nicer backend through [MWSearch](#) extension.

For the average site administrator, the benefit of this extension is that it allows search suggestions (e.g. from [Opensearch API](#)) to be case-**ins**ensitive.
