

## Manual:Extension/BlueSpiceArticleInfo

The ArticleInfo provides some information about the current page via the StateBar:

- when last edited (Link to versions / authors)
  - \* edited by who last (Link to user page of the author)
  - \* the first three categories of the article (link to the category pages)

When the StateBar is opened, the following information is also available:

- Categories of this article
  - \* Templates that are included on this article
  - \* The subpages of an article
