What is Blog?

The **Blog** extension allows creating news feeds on the wiki. These news feeds can be shown on any page, and users can be allowed to add their own news.

Usage / Features

To display a blog on the page, tag `<bs:blog />` should be placed on it.

By default it will show all the pages in Blog namespace as blog entries.

Behaviour of the blog can be influenced, by adding attributes to this tag. In this way number of entries shown, if the new entry form will be displayed and more can be configured,

Configuration

Some aspects of this extension can be configured on [Special:BlueSpicePreferences](#), under section "Blog". Here wiki administrators can configure the default values for all the settings that can be configured by adding attributes to the blog tag

Rights (permissions)

This extension introduces new permission "blog-viewspecialpage" that allows users who have it to access [Special:Blog](#)

Requirements

Blog requires BlueSpice Foundation.

User manual

For detailed description and usage please visit [user manual](#).
