## What is BookshelfUI?

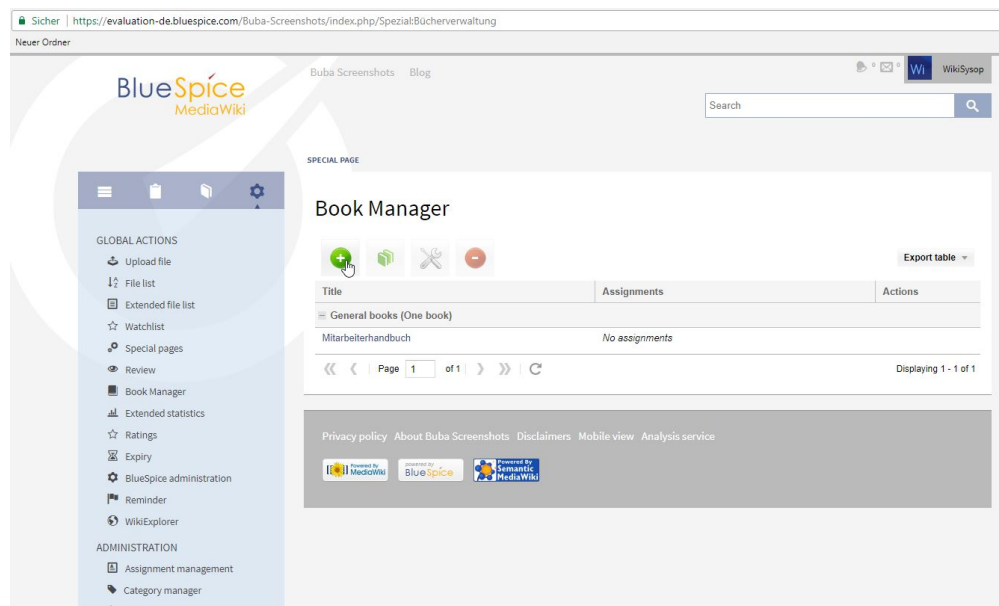

**BookshelfUI** provides a graphical interface for creating, editing and managing books. It consists of a book editor, a book management and an integrated navigation.

## Where to find BookshelfUI?

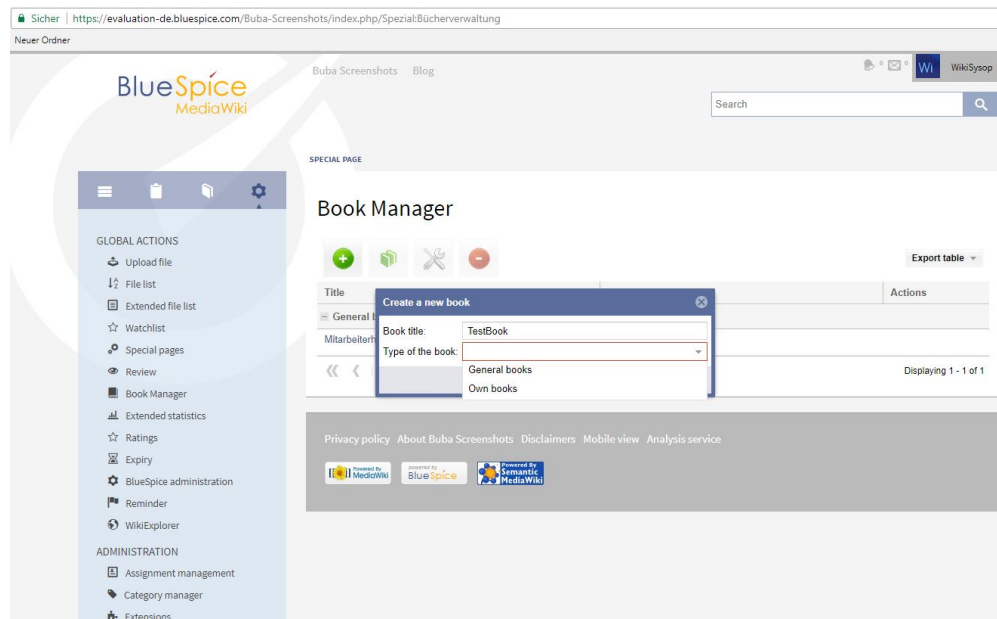

### Global actions, BookManager:

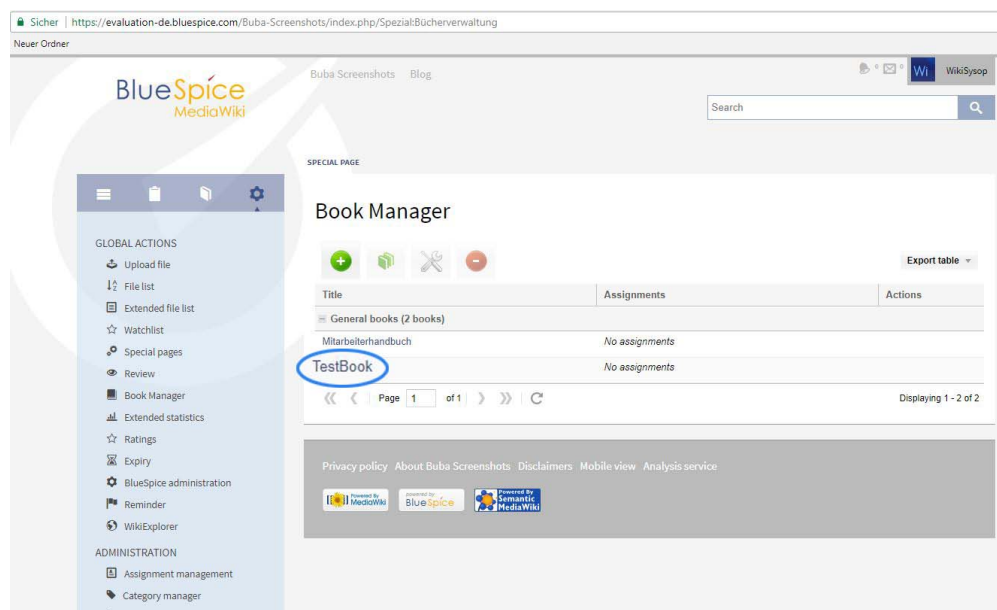

### Add:

Add title of the book:

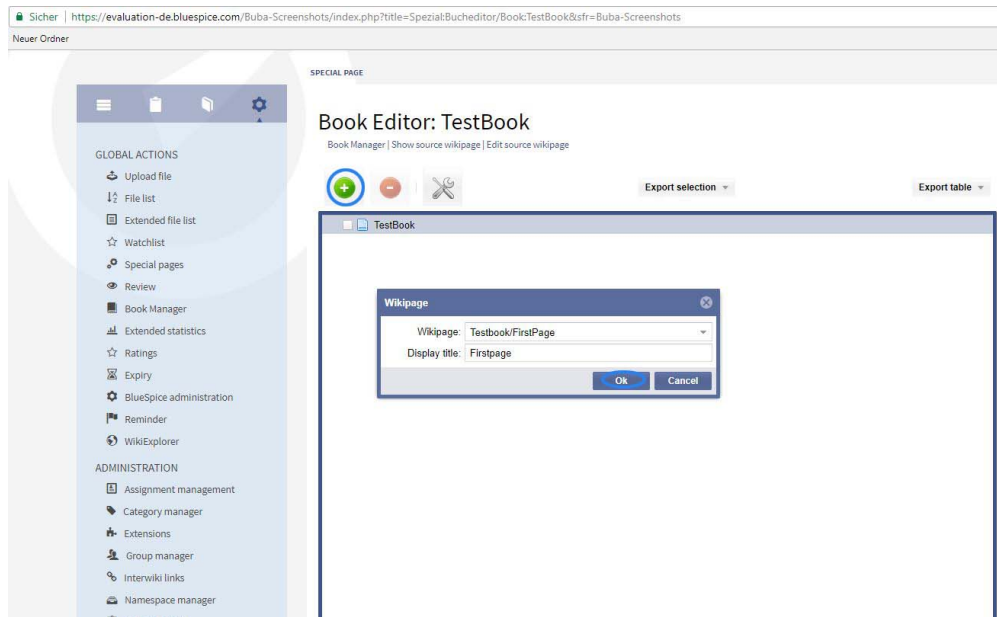

Book is created:

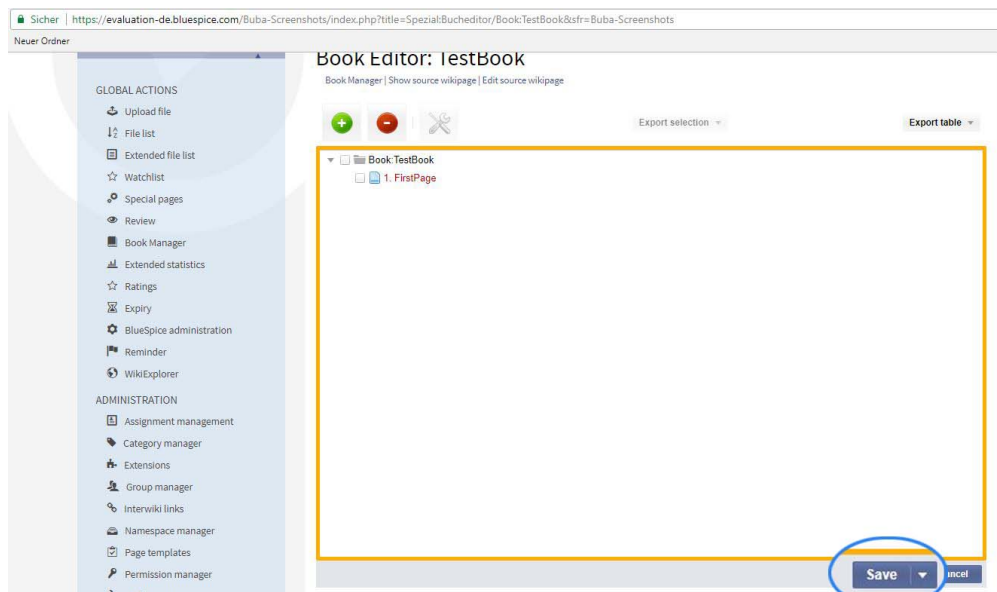

## Create Article/Page in the book

To create article in the book, click **Add** and specified the title:

All changes will only become active after clicking on the "Save" button.

Right click to manage:

## Books management

- In the book management books can be created, copied and deleted.
- When creating a title must be specified.
- The already existing books are displayed in a list.

## Book Editor

- The book editor displays the contents of a book in a hierarchical folder structure.
- Book chapters are added in the form of wiki articles. A selection dialog opens for this purpose.
- Book chapters can be renamed.
- Book chapters can be dragged into the desired order by Drag'n'Drop.
- Book chapters can be deleted via an icon. It is not the article itself deleted, but only taken from the book.
- Metadata can be inserted via a dialog.
- All changes will only become active after clicking on the "Save" button.
- When saving, the bookshelf tags in the articles are copied (if desired).
- It is possible to mark individual chapters for export.
- If the user clicks on "Export selection", he receives a document in the selected format. At least one export extension must be activated for this.

## Integrated navigation

- The navigation is a separate tab in the sidebar.
- It consists of two areas
  - Available Books shows a list of all the books stored in the system
  - Chapter shows the chapter navigation of the currently selected book.
- The two areas are represented by an accordion grid. This also means that only one area is open at a time.

- The ad will be preserved the same way the user selected it when the page was changed.
