## Description

---

**Teamwork** is a software package to support quality assurance through workflows.

## Usage / Features

---

If:

- Manuals and documentations need to be created in a specified process.
- Articles have to be finished on a set date.
- Work for the individual employee should be minimized by distributing editing bit by bit.
- Quality in your wiki should be enhanced by approvals and fixed contact persons.
- Cooperation in your wiki should be done "the professional way".

## Technical information

---

### Configuration

### Rights (permissions)

The following rights concern Teamwork:

Right	Function
review	The user can view and approve draft versions.
validate	This right is used by BlueSpice in a modified way, but is not relevant for the use of FlaggedRevisions.
autoreview	Changes done by a user will automatically be approved.  Please note: in addition to granting this right, the administrator also has to activate the function by checking the entry <i>Enable auto review</i> in the preferences of <i>FlaggedRevsConnector</i> .
stablesettings	This right is used by BlueSpice in a modified way, but is not relevant for the use of FlaggedRevisions.
unreviewedpages	The user can see the special page <span>Special:UnreviewedPages</span> .
workflowview	The user can see the workflow of an article; display of the <i>Eye</i> icon
workflowedit	Create, edit, change and delete a workflow
workflowlist	The user can see the workflow overview on <span>Special:Review</span>
