Description

Showtime is a video player that enables you to play all the usual HTML5 video formats in your wiki.

Usage / Features

- Activated with the `<bs: showtime> Video.mp4 </ showtime>` tag,
- There is the possibility to change the size,
- There is the possibility to start the video immediately (autoplay),
- There is the possibility to play the video in a loop,
- Uploaded videos in the formats mp4, ogv, flv and webm are played,
- It is possible to include multiple videos on one page,
- In IE and flv, the HTML5 player falls back to a Flash version (default in VideoJS),
- For compatibility reasons, bs: jwplayer is also supported as a tag.

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Showtime". Here wiki administrators can configure:

- Whether videos should start automatically
- Whether to repeat videos automatically
- Default video height in px
- Default video width in px

Rights (permissions)

This extension does not require any special rights.
