Allows to export an article as PDF

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Universal export PDF module". Here wiki administrators can configure:

- Default template used
- Backend URL
- Whether to hide namespace prefix in PDF
- Template directory (physical path to the directory holding the templates)

Rights (permissions)

This extension does not require any special rights.

Requirements

UEModulePDF requires [BlueSpiceFoundation](#) and [UniversalExport](#).

User manual

UEModulePDF enables the output as Adobe Portable Document Format (PDF). Read more on [UniversalExport](#).
