Features

Merge several users into one account

The **UserMerge** extension allows wiki users with the *usermerge* permission (Bureaucrat by default) to merge one Wiki user's account with another Wiki user's account.

The extension allows to

- merge (refer contributions, texts, watchlists, edit count of a first account A to a second account B)
- delete the first account A after the merge (option box)

Limitations

- you cannot delete a user A without having merged the user A to B
- you cannot merge your own account (logged-in user) into a different user

Extras

- if you omit the "New User" field, then the extension auto-populates the New User as "Anonymous" (user_id 0), and ask you to confirm a merge to Anonymous. This is used for user deletion: you first empty (merge to user 0) contributions of a user A, and then delete the user A.
 - If your version of the extension complains about an empty "New User" field you can fill in "Anonymous".
