|--------------------------------------------|---|
| 1 Installing MariaDB .....                 | 2 |
| 2 Create database user for BlueSpice ..... | 2 |
| 3 Next Step .....                          | 2 |

**BlueSpice stores your content in a database for which you need to install a corresponding server. The steps listed here are required.**

## Installing MariaDB

---

Install MariaDB via Aptitude:

```
apt update; \  
apt install mariadb-server mariadb-client; \  
apt clean
```

## Create database user for BlueSpice

---

After installation, immediately create a database user for MariaDB directly with the following command:

```
mysql -e "GRANT ALL ON bluespice.* TO 'bluespice'@'127.0.0.1' IDENTIFIED BY '<ein  
Passwort Ihrer Wahl>';"
```

## Next Step

---

If you have completed all steps successfully, you can proceed to the next step "[Jetty](#)".
