What is WikiAdmin?

WikiAdmin is a container (tab in the left navigation), where an administrator can find special admin functions.

Where to find Wiki Admin functions?

There is also an overview of the most important administration functions on the special page "WikiAdmin". Please go to `Special:WikiAdmin` to open this page.

Functions of WikiAdmin

In the wiki admin area you will find functions that can be used only by administrators. The links in the sidebar are arranged alphabetically.

What are admin functions?

- **Extensions**: This page shows you every installed extension and gives information about the current version of every extension.
- **Group manager**: You can add groups and manage them here.
- **Interwiki links**: You will find the InterWiki manager on this page, where you can create, configure or delete Interwiki links (links to another wiki, e.g. Wikipedia).
- **Namespace manager**: Create new namespaces and manage them on this page.
- **Permission manager**: Manage all rights e.g. for groups and namespaces here.
- **Preferences**: Lots of settings can be done here, for example defining if your wiki can be accessed from everyone or only for registered users.

- **User manager:** This page gives you the possibility to add new users, manage group memberships and to assign passwords.
- **Skin:** Change the skin of your wiki.
- **Dashboard:** Create your personal admin dashboard.
- **Page templates:** On this page you can integrate new page templates and edit or delete already existing templates.
- **Search options:** Settings for the search.

Extension\ BlueSpicePageTemplates

Overview			
Description:	Displays a list of templates marked as page templates		
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL-3.0-onlyProperty "BSExtensionInfoLicense" (as page type) with input value "</br>GPL-3.0-only" contains invalid characters or is incomplete and therefore can cause unexpected results during a query or annotation process.

Overview			
Type:	BlueSpice	Category:	Content Structuring
Edition:	BlueSpice free, BlueSpice pro, BlueSpice Farm, BlueSpice Cloud		
View help page			

Features

BlueSpicePageTemplates allows users to create new pages from predefined templates to start with a basic page structure.

- Create a template (with headers, categories, boxes and other content) in the template namespace.
- Create a page template using the special page Special_PageTemplatesAdmin give the page template a name and a description.
- Each template should be assigned a template from the "Template" namespace that represents the structure of a document.
- Page templates can be assigned to a particular namespace, so that a certain template will only appear when creating pages in that namespace.
- The page template is shown as a choice when a new page is created.

Some aspects of this extension can be configured on the page Special:BlueSpiceConfigManager, under "Page templates". Here, wiki administrators can:

- Force a target namespace for the page that was created from the template
- Hide default templates

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31

BlueSpiceFoundation: 3.2

Integrates into

Special pages

- PageTemplatesAdmin

Permissions

Name	Description	Role
pagetemplatesadmin-viewspecialpage	Access to the Special:PageTemplatesAdmin special page, where page templates can be managed	admin, maintenanceadmin, structuremanager

Configuration

Name	Value
PageTemplatesExcludeNs	array (0 => -2, 1 => -1, 2 => 6, 3 => 7, 4 => 8, 5 => 9, 6 => 10, 7 => 11, 8 => 14, 9 => 15,)
PageTemplatesForceNamespace	false
PageTemplatesHideDefaults	false
PageTemplatesHideIfNotInTargetNs	true
