## Description

---

**Preferences** is an extension allowing wiki administrators to change key settings of the wiki, without resorting to scripts and manual settings in LocalSetting.php file. These settings are wiki-wide, although some of them can be overridden on user level through [UserPreferences](#).

## Usage / Features

---

The display shows different areas for the individual extensions. These areas can be fully displayed or collapsed. By default they will be collapsed. Click on the arrow symbol to see the further options. The different options for configuring the different extensions are described on the pages detailing the relevant extensions.

## Technical information

---

### Configuration

This extension offers no configurations.

### Rights (permissions)

Users must have "bluespicepreferences-viewspecialpage" permission in order to change preferences.

### Requirements

Preferences requires [BlueSpiceFoundation](#).

## User manual

---

For detailed description and usage, visit our [user manual](#).

## Try free our BlueSpice

---

[BlueSpiceDemo](#).
