Description

Preferences is an extension allowing wiki administrators to change key settings of the wiki, without resorting to scripts and manual settings in LocalSetting.php file. These settings are wiki-wide, although some of them can be overridden on user level through [UserPreferences](#).

Usage / Features

The display shows different areas for the individual extensions. These areas can be fully displayed or collapsed. By default they will be collapsed. Click on the arrow symbol to see the further options. The different options for configuring the different extensions are described on the pages detailing the relevant extensions.
