Customized PDF Output

A [quality version](#) of this page, [approved](#) on *11 January 2021*, was based off this revision.

How to adjust page breaks in multi-page PDFs.

Adjusting page breaks

By default, each chapter and sub-chapter in a Book-PDF is started on a new page. To avoid these page breaks and to create a continuous chapter flow, an administrator can add the following code to the page MediaWiki:Common.css:

```
/*PDF book - no page breaks between chapters*/
.bs-page-content { page-break-after: avoid; }
```

If you want to start the main chapters on separate pages, use this code instead:

```
/*PDF book - page break only after chapter level 1 */
.bs-page-content { page-break-after: avoid; }
.bs-page-content.booklevel-1 { page-break-before: always; }
```

You can add further chapter levels as needed:

```
/*PDF book - page breaks after chapter levels 1 and 2*/
.bs-page-content { page-break-after: avoid; }
.bs-page-content.booklevel-1, .bs-page-content.booklevel-2 { page-break-before: always;
}
```

Namespace CSS manager

A [quality version](#) of this page, [approved](#) on *11 January 2021*, was based off this revision.

The extension **NamespaceCSS** allows users to apply different CSS styles to different namespaces.

Contents

1 Creating the styles for a namespace	4

Creating the styles for a namespace

The link *Namesapce-CSS Manager* in the menu *Global actions > Management* opens the page *Special:NamespaceCSSManager*. This page lists all namespaces and the link to their associated CSS page.

Namespace	Source page
Manual	MediaWiki:Manual.css
Legal	MediaWiki:Legal.css
Setup	MediaWiki:Setup.css
Reference	MediaWiki:Reference.css
FAQ	MediaWiki:FAQ.css

Namespace-CSS Manager

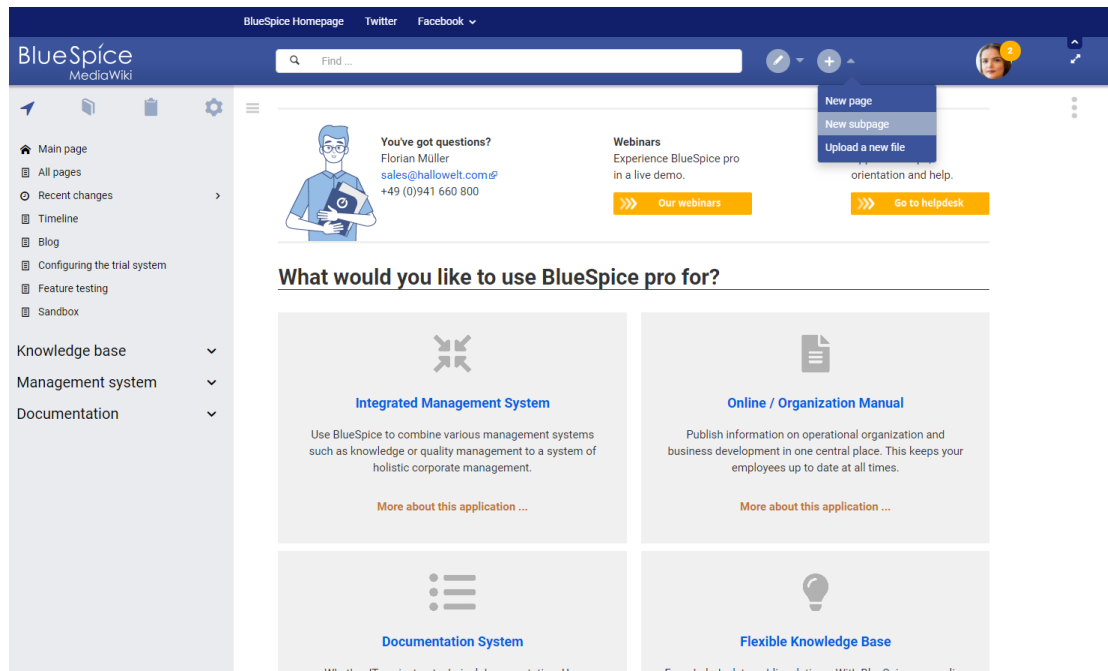

To add or overwrite the styles for a namespace:

1. **Click** on the source page link for the namespace.
2. **Enter** your CSS-code directly in this page. Example: *MediaWiki:User.css* affects all pages in the namespace *User*.
3. **Save** the page and review your changes on the pages in the affected namespace.
