Features

CategoryManager is an administration interface for categories. You can add new categories, move or delete them in a tree structure.

- Overview of all categories.
- Quickly create and assign a new category page.
- Change the category tree using drag & drop.
- Delete a category without editing the individual Wiki articles.
- Navigation item to the page *Special:Category_manager*.

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31.0
BlueSpiceFoundation: *

Integrates into

- BlueSpiceExtendedStatistics

Special pages

- BlueSpiceCategoryManager

Where to find the category manager

The navigation item *Global settings* > *Category manager* (in the Management menu) loads the page *Special:Category manager*.

Clicking on the view icon next to a category opens the category page that lists all wiki pages in this category.

Creating a category

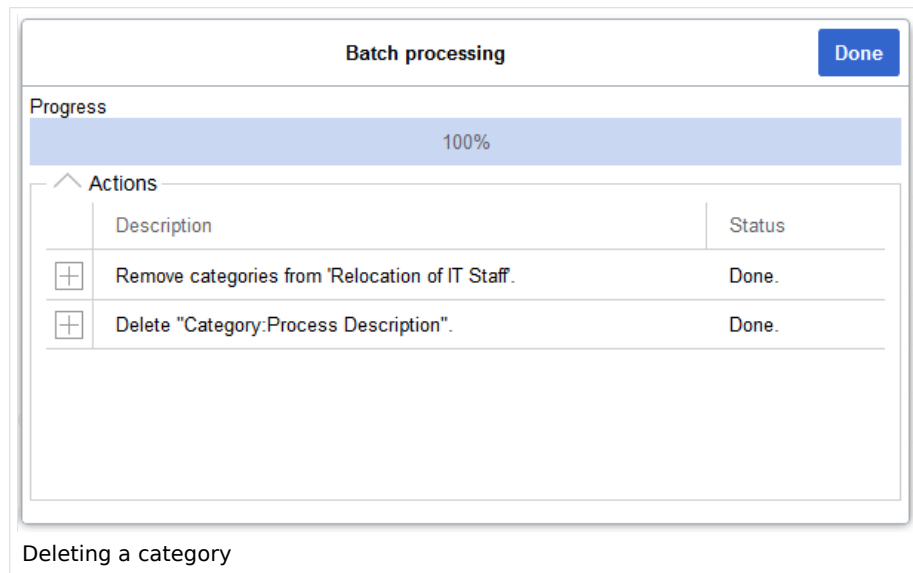

New categories can be created by clicking the "plus" button. This opens a dialog box for creating the category.

Deleting a category

A category can be deleted by:

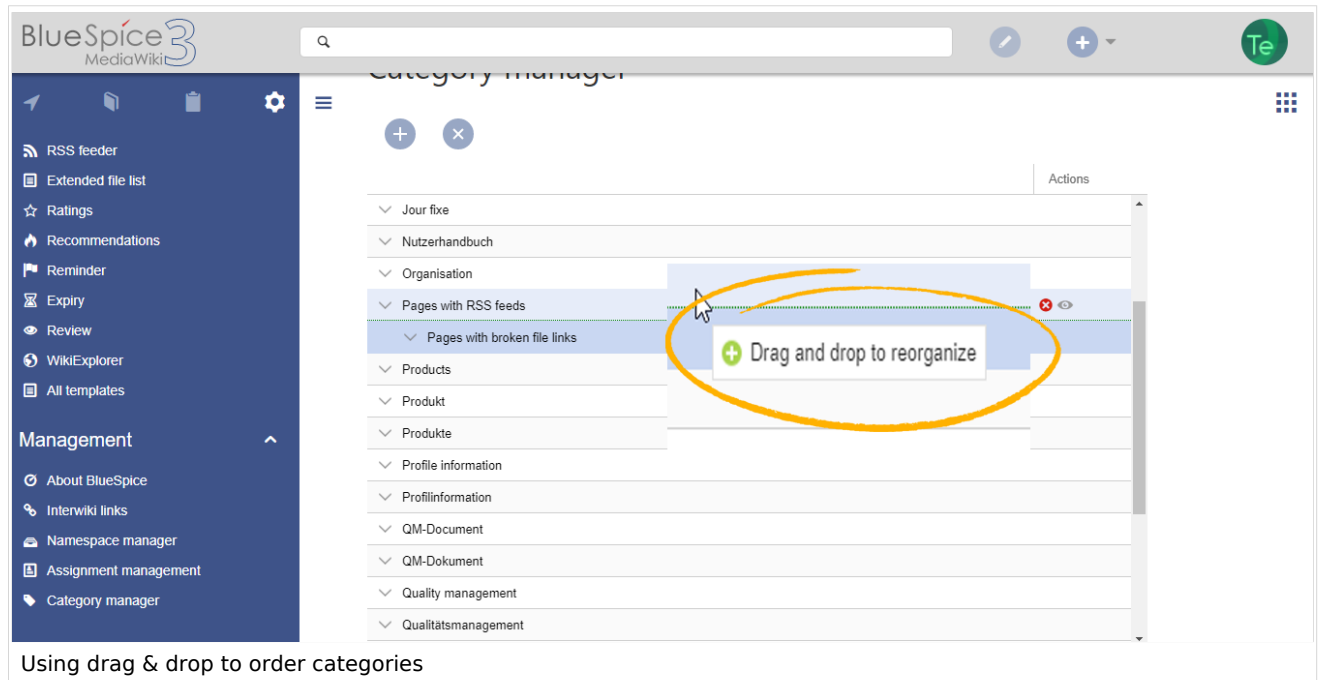

- selecting a category and clicking the delete button above the category list
- selecting a category and clicking delete button inside the category line.

Deleting a category removes the category from all pages that had the category assignment. It also deletes the category page itself.

Re-ordering a category

The category order can be changed by dragging and dropping categories in the list. This is achieved by clicking and, while holding down the mouse button, dragging the category up or down. Dropping a category over another category (instead of in-between two categories) creates a subcategory.

Note: It is not possible to rename a category using the category manager. To rename a category, a wiki administrator can use the special page "Replace".
