Extension/PagesVisited

The extension **PagesVisited** creates a list of your recently visited pages.

Contents

1	Personal navigation	3
2	Embedding the tag on a page	4
3	Related info	5

Personal navigation

The functionality is integrated in the [personal navigation menu](#) (clipboard icon). If it has been removed, it can be re-added on the page *User:<username>/Sidebar*. This page is loaded when the *Edit sidebar* link at the bottom of the sidebar is clicked. This link is visible when you hover over any existing navigation item.

To display recently visited pages add the following item to the page:

```
* PAGESVISITED
```

Embedding the tag on a page

While in source edit mode, enter the following tag anywhere on the page.

```
<pagesvisited count="10" />
```

The list of recently viewed pages will appear at the place in the page where the tag was inserted.

Options that can be passed to the tag are:

- *count* - number of pages to show
- *maxtitlelength* - maximum length of each shown page
- *namespaces* - list of namespaces from which to show pages. Multiple namespaces can be entered, separated by comma.
- *order* - sorting of the pages displayed - can be "time" or "pagename"

Personal navigation

A [quality version](#) of this page, [approved](#) on *23 July 2020*, was based off this revision.

The extension **UserSideBar** lets users create their personal sidebar navigation.

Contents

1	Accessing the personal navigation	6
2	Default content	6
3	Customizing the sidebar	6
4	Related info	7

Accessing the personal navigation

Every logged-in user has their own UserSidebar. It is located in the left navigation as the *Personal navigation* tab (clipboard icon).

Default content

Initially, for users who haven't customized their personal sidebar, the navigation shows the following widgets:

- Pages visited (widget PAGESVISITED)
- My edits (widget YOUREDITS)
- Watchlist (widget WATCHLIST)

These widgets can be removed individually when a user customizes the sidebar.

Customizing the sidebar

To customize the content of this sidebar, click on *Edit sidebar* at the bottom of the sidebar after hovering over any menu item. This opens the page *User:<username>/Sidebar*.

The syntax used to define the sidebar corresponds to the main MediaWiki sidebar (MediaWiki:Sidebar). Entries starting with a single star ("*") are considered menu headings or sections while entries with two stars ("**") are considered menu items.

```
* My favourite pages
** [[Wiki_Page1|Label]]
** [External_Page2 Label]
```

The sidebar can contain multiple sections. Also, users can use widgets to display predefined lists of pages, as described above. Widgets should be inserted as sections (with one star), like:

```
* WATCHLIST
* My custom section
** [[Page1]]
...
```
