Creating the styles for a namespace

The link *Namesapce-CSS Manager* in the menu *Global actions > Management* opens the page *Special:NamespaceCSSManager*. This page lists all namespaces and the link to their associated CSS page.

Namespace	Source page
Manual	MediaWiki:Manual.css
Legal	MediaWiki:Legal.css
Setup	MediaWiki:Setup.css
Reference	MediaWiki:Reference.css
FAQ	MediaWiki:FAQ.css

Namespace-CSS Manager

To add or overwrite the styles for a namesapce:

1. **Click** on the source page link for the namespace.
2. **Enter** your CSS-code directly in this page. Example: *MediaWiki:User.css* affects all pages in the namespace *User*.
3. **Save** the page and review your changes on the pages in the affected namespace.
