

Manual:Changing the logo

A [quality version](#) of this page, [approved](#) on *16 February 2021*, was based off this revision.

To change the logo of your wiki, update the logo path via the Config manager, extension *BlueSpiceFoundation*:

- **Logo path:** The logo image should be stored in the `/images` folder of your installation. If you store it in the `/skins` folder of your BlueSpice installation, it could be overwritten with an upgrade.

To upload the logo directly in the wiki:

1. **Upload** the logo on the page *Extended file list* (*Special:ExtendedFilelist*). This is a link under the *Global actions* navigation.
2. **Search** for the logo name in the extended file list.
3. **Click** on the thumbnail image of the logo. This opens the logo on a separate page.

4. **Copy** the relative logo path from the address bar. In a typical Wiki configuration, this path starts with `/w/....`.

5. **Paste** the logo path into the text field for the logo.

Extension	
☒ BlueSpiceFoundation ☐ BlueSpiceAbout ☐ BlueSpiceArticleInfo ☐ BlueSpiceAuthors	Skinning Logo path: /w/nsfr_img_auth.php/6/68/LASERLINE_Logo_2016.png Favicon path:

logo path

6. **Click** *Save*.

7. **Refresh** the page (Strg+F5).

If the uploaded logo is too large, you can add the following code snippet to the page *MediaWiki:Common.css*. This automatically adjusts the image to the height of the main toolbar:

```
.bs-logo a {background-size: contain;}
```

- **Favicon path:** The favicon image should be stored in the */images* folder of your installation. If you store it in the */skins* folder of your BlueSpice installation, it could be overwritten with an upgrade. [Favicon images](#) have the file extension *.ico*.
