## Enable edit mode

---

To edit an existing page, click the "edit" button.

## Editing

---

You can now add and change content in the content area of the page.

Most users will edit page content using the VisualEditor toolbar. VisualEditor has many features that make page editing much easier.

However, special pages such as templates are edited directly in the source text. Therefore, a knowledge of the Wikitext syntax is necessary for these pages.

## Preview

---

With the **Preview** button, you can check if you really want to save your changes. This way, you can gradually test small changes. Saving the page repeatedly after small editing steps will result in a large amount of entries in the article's version history. That does not always make sense.

The function **SaferEdit** automatically saves intermediate versions at defined time intervals while editing an article so that content is not lost if a page has not been saved for a while.

## Elements of the "save" dialog

---

To save the page, click the "Save changes" button. The corresponding dialog window opens:

Resume editing
Save your changes
Save changes

Summary:

Describe what you changed

This is a minor edit
  Watch this page

Please note that all contributions to Bluespice may be edited, altered, or removed by other contributors. If you do not want your writing to be edited mercilessly, then do not submit it here.  
 You are also promising us that you wrote this yourself, or copied it from a public domain or similar free resource (see [Legal:Copyright](#) for details). **Do not submit copyrighted work without permission!**

Review your changes
Show preview

The following elements are part of the dialog window:

Element	Type	Description
<b>Summary</b>	textarea	A brief description of the changes makes it easier to understand the changes in the version history.
<b>This is a minor edit</b>	checkbox	Spelling corrections or formatting changes are usually marked as such. Under <a href="#">Recent Changes</a> , such changes are marked with the letter <b>m</b> ("minor changes"). This makes it easy to differentiate in which article version major changes have been made. In addition minor changes can be excluded from the watchlist.
<b>Watch this page</b>	checkbox	A check mark in this box causes the page to be included in the personal <a href="#">Watchlist</a> .
<b>Accept this unreviewed page</b>	checkbox	This box will only be displayed if the revision function is activated in a namespace. A user with the corresponding rights of release can release the page design directly here.
<b>Copyright notice</b>	text	The slightly longer text between the article field and the page-save functions is the copyright notice.
<b>Save changes</b>		Clicking on this button saves the article with all changes made. The edit view will be closed.
<b>Resume editing</b>		This button returns directly to the page without saving the article. Editing is simply continued.
<b>Show preview</b>		The page opens in a preview window and can be saved from this window.
<b>Review your changes</b>		Shows a comparison of the article before editing and at the time of the current processing status with marking of the differences. The changes can be saved directly from this page

## Editing conflicts

If you try to save a page that someone else is currently also working on, the system will report an [editing conflict](#). Each author can compare the current changes and merge them as needed.

## Blocked pages

---

Some pages can be protected and edited only by administrators. Instead of the edit option, a link to "View source code" appears. The cause is often obvious from the version history of the page. In this case, you can contact an administrator who can unlock the page.
