Setting the filter option

To create the table filter, the CSS class "filterable" is added to the table.

Using VisualEditor

In edit mode, click on the table to open the options popup and click on "Properties". In the dialog that opens, toggle on "Filterable" option.

The left screenshot shows a table with a 'Table' popup open, and the 'Properties' button is circled in orange. The right screenshot shows the 'Table properties' dialog with the 'Filterable' toggle switch turned on and circled in orange.

Selecting table properties

Setting the filter option

Using Wikitext

```
{| class="wikitable filterable"
|+
!Heading 1
!Heading 2
!Heading 3
!Heading 4
|-
|Cell 1
|Cell 2
|Cell 3
|Cell 4
|-
|Cell 5
|Cell 6
|Cell 7
|Cell 8
|-
|Cell 9
|Cell 10
|Cell 11
|Cell 12
|}
```

Adding the "filterable" class in wikitext

In source-editing mode, add the class "filterable" to the table header.

```
{| class="wikitable filterable"
|+
!Heading 1
...
}
```

Filtering tables

The special filter layout of a table is only applied in view mode.

To filter the values in the table, click on the header of the column to filter and select "Filter" from the dropdown menu. In the input field that opens, type in the filter text.

The screenshot shows a MediaWiki page titled "Test" with a table containing four columns: "Heading 1", "Heading 2", "Heading 3", and "Heading 4". The "Heading 3" column has a dropdown menu open, showing options for "Sort Ascending", "Sort Descending", "Columns", and "Filters". The "Filters" option is selected, and a search input field with the number "3" is visible. A yellow circle highlights the dropdown menu and the search input field.

Applying a table filter

Note: Any table styles that are applied by the table class are ignored as long as the value "filterable" exists in the class rule. A filterable table comes with its own table styling.
