Expiry

A quality version of this page, approved on *5 October 2020*, was based off this revision.

Expiry marks a wiki page as "obsolete". The page can be updated by editing or by confirming that the page is still up-to-date. Expiry is the ideal basis for an archiving system. Outdated articles can be moved to an archive after being queried. Expiry can be set on any content page of the wiki.

Expiring a page

Page tools

Expiry for a page can be set from the *Quality management tab* in the page tools. After clicking on "Expiry", a form opens in a fly-out layer.
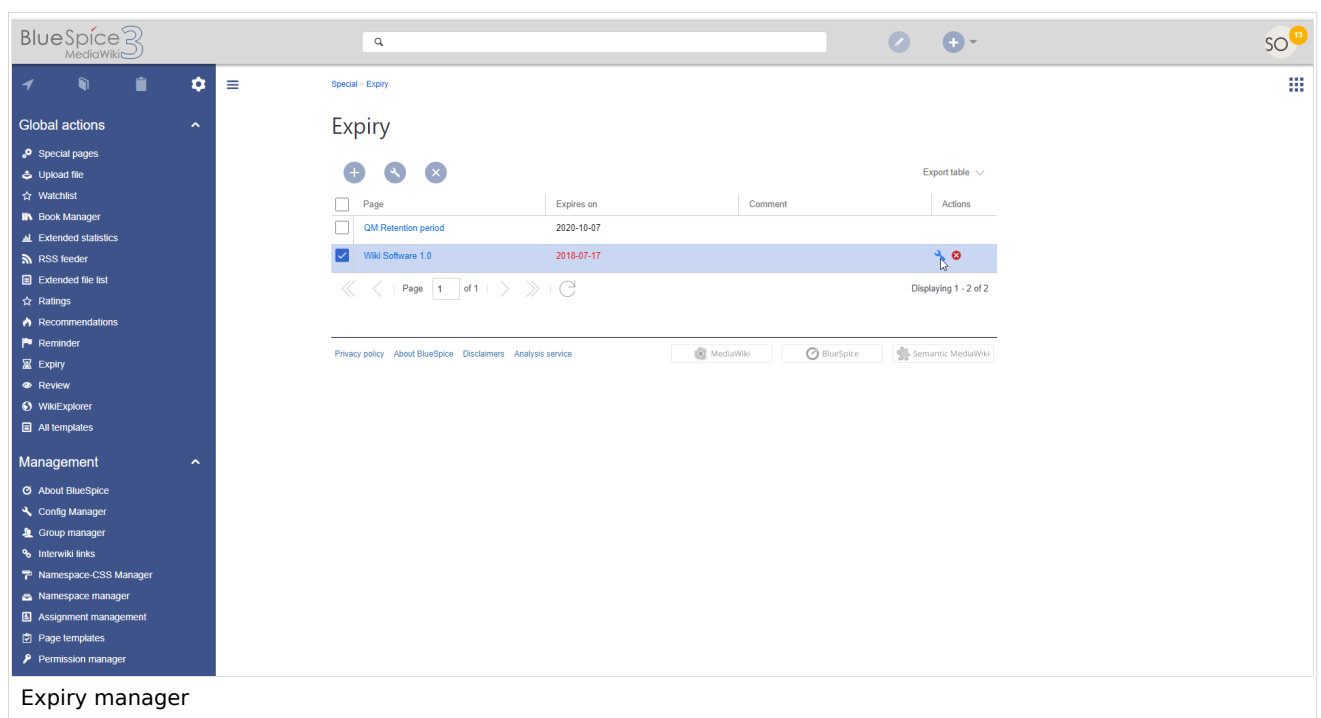

If the page has already been expired, the expiration date is shown. In this case, a user can remove the expiration from the page by clicking on *Unexpire the page*.

If no expiration date is set, users can set an expiration date and enter a short comment: In addition, the user can create a reminder for the page. After saving the form, the page is reloaded and updated information is displayed.

Expiring a page

## Overview of expired wiki pages

Users can see all of the pages set to expire, along with expiry information for those pages on *Special:Expiry* page. This page can be accessed from the Expiry flyout described above, by clicking on Expiry manager at the bottom of the flyout. All expiration dates can be deleted or edited from this page.

Expiry manager

Configuration

In the Config manager, you can change the following settings:

- **Show watermark for expired pages in PDF:** Shows the watermark for expired pages in PDFs.
- **Show watermark for expired pages in print version:** Shows the watermark for expired pages when a page is printed.
- **Show watermark for expired pages**: Shows a watermark on the page itself.
