Setting the filter option

To create the table filter, the CSS class "filterable" is added to the table.

Using VisualEditor

In edit mode, click on the table to open the options popup and click on "Properties". In the dialog that opens, toggle on "Filterable" option.

The left screenshot shows a table with 4 columns and 4 rows. Below the table, a 'Table' popup menu is visible with 'Delete' and 'Properties' buttons. The 'Properties' button is circled in orange. Below the table, there are links for 'Privacy policy', 'About BlueSpice', 'Disclaimers', and 'Change cookie consent', and logos for 'MediaWiki', 'BlueSpice', and 'Semantic MediaWiki'.

The right screenshot shows the 'Table properties' dialog. The 'Filterable' toggle switch is turned on and circled in orange. Other options include 'Caption', 'Styled (wikitable)', 'Sortable', 'Collapsible', 'Collapsed initially', and 'Exportable'.

Selecting table properties

Setting the filter option

Using Wikitext

```

{| class="wikitable filterable"
|+
!Heading 1
!Heading 2
!Heading 3
!Heading 4
|-
|Cell 1
|Cell 2
|Cell 3
|Cell 4
|-
|Cell 5
|Cell 6
|Cell 7
|Cell 8
|-
|Cell 9
|Cell 10
|Cell 11
|Cell 12
|}

```

The 'wikitable filterable' class is circled in orange in the code above.

Adding the "filterable" class in wikitext

In source-editing mode, add the class "filterable" to the table header.

```
{| class="wikitable filterable"  
|+  
!Heading 1  
...  
}
```

Filtering tables

The special filter layout of a table is only applied in view mode.

To filter the values in the table, click on the header of the column to filter and select "Filter" from the dropdown menu. In the input field that opens, type in the filter text.

Applying a table filter

Note: Any table styles that are applied by the table class are ignored as long as the value "filterable" exists in the class rule. A filterable table comes with its own table styling.
