Manual:Extension/Scribunto

A [quality version](#) of this page, [approved](#) on *23 November 2020*, was based off this revision.

Lua Module

Characteristics

- enabled by extension *Scribunto*
- edited in the namespace *Module*
- can be integrated in Semantic MediaWiki
- many built-in functions
- faster than parser functions
- easier to read and to maintain than parser functions
- need a parser function to be invoked: `{{#invoke:<modulename>|<functionname>|<params>...}}`
