Manual:Iframe

A [quality version](#) of this page, [approved](#) on *14 April 2021*, was based off this revision.

You can insert an iframe on a wiki page with the widget *Iframe*. Make sure to read the [security information for this widget](#).

Using the widget "Iframe"

1\ Creating the widget page

First, you have to create the page *Widget:Iframe* Copy the following content to the page and save it:

```
<noinclude>__NOTOC__
This widget allows you to embed any web page on your wiki page using an <code>iframe</code>
```

Created by [https://www.mediawikiwidgets.org/User:Sergey_Chernyshev Sergey Chernyshev].

```
== Using this widget ==
For information on how to use this widget, see [https://www.mediawikiwidgets.org/Iframe
```

<big>'''This widget should not be used on a publicly-editable wiki.

While the URL is validated to be a valid URL, there is no way the widget can check the c

```
== Copy to your site ==
To use this widget on your site, just install [https://www.mediawiki.org/wiki/Extension
```

```
</noinclude><includeonly><iframe src="<!--{$url|validate:url}-->" style="border: <!--{$l
```

2\ Create an iframe on any wiki page

Add the following code to the wiki page where you want to include an iframe:

```
{{#widget:Iframe
|url=https://page-to-be-embedded /*url of the page to be displayed in the iframe.*/
|width=410
|height=342
|border=0
}}
```

[Template:Box Links](#)

Widget:Iframe

This widget allows you to embed any web page on your wiki page using an iframe tag.

Created by [Sergey Chernyshev](#)

About this widget

For information on how to use this widget, see [widget description page on MediaWikiWidgets.org](#). This site requires you to create an account to login.

This widget shouldn't be used on a publicly-editable wiki.

While the url is validated to be a valid url, there is no way the widget can check the contents of the page that is included. When enabling this widget, you allow any user that can edit to include any page, including malicious pages (containing trojans, backdoors, viruses etc), pages that brake out of the iframe and pages that look like your site, but actually is a copy used for phishing.

How to use this widget

See the [help page for this widget](#).
