# 2.4 Manual:Semantic MediaWiki/Examples/Customer data /Form edit mode

A quality version of this page, approved on *7 January 2021*, was based off this revision.
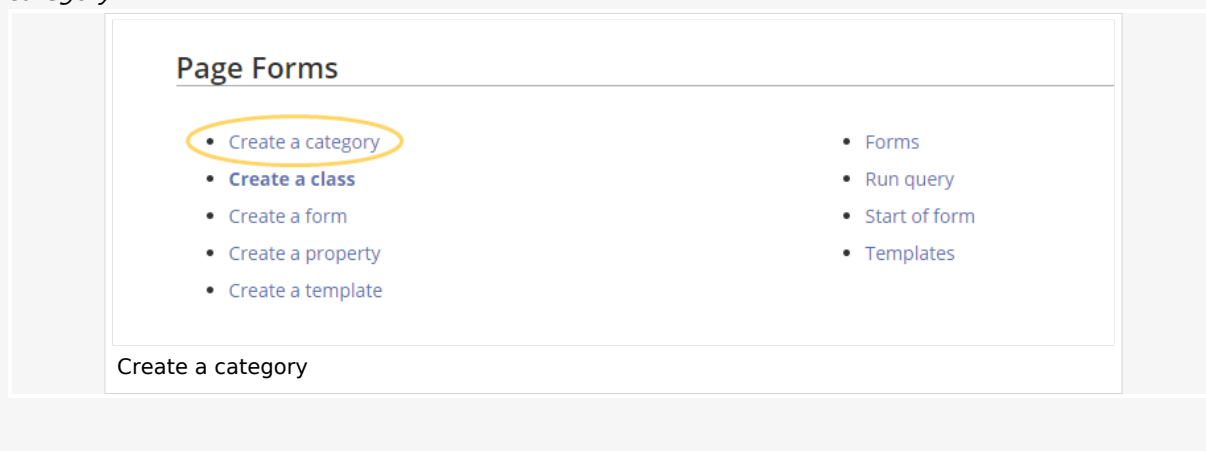

With the page *Special:CreateCategory,* we now connect the category *Customer data* with the form *Customer data*.

This adds a **form edit link** to all pages that use the **template** *Customer data*. Additionally, it makes it possible to list pages that include customer data all throughout the wiki.

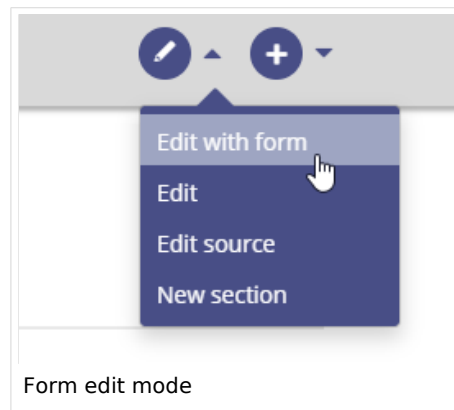

Form edit mode

Activating the form edit mode

1 Switch again to the page *Special:Special pages*. In the section *Page Forms,* click the link *Create a category.*

Create a category

2 Enter the category name you chose in step "Create template". In our case, this is the category *Customer data* (1). Select the form *Customer data* (2). Click *Save page* (3).

Associate category and form

The category page *Customer data* is now associated with the form *Customer data*.

Category that is associated with a form

As a result, all pages that contain the template Customer data now have a form edit link available.

Form edit mode

> **Note:** If you do not want to use a category to make the "form edit" option available on a page, you can also associate the form with a namespace or simply add the form reference directly to the template. For more information see the instructions on mediawiki.org
