1. Property:Has improper value for	2
2. Property:Allows value	2

Property:Has improper value for

"Has improper value for" is a predefined property that tracks input errors for irregular value annotations and is provided by [Semantic MediaWiki](#). In most cases it is caused by a type mismatch or a [value](#) restriction. This property is pre-deployed (also known as [special property](#)) and comes with additional administrative privileges but can be used just like any other [user-defined property](#).
