View help page			

Features

InsertCategory allows to add categories to a page in view mode or in visual edit mode.

This extension is in use in the page information flyout, in the [title section](#) and in the [multi-upload](#) dialog.

Some aspects of this extension can be configured on Special:BlueSpiceConfigManager, under section "Insert category". Here wiki administrators can configure:

- whether to set the page categories as default in the file upload dialog
- whether to insert a category with its parent category

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31
BlueSpiceFoundation: 3.2

Integrates into

- BlueSpiceArticleInfo

Special pages

Configuration

Name	Value
InsertCategoryUploadPanelIntegration	false
InsertCategoryWithParents	false

Hooks

- [BeforePageDisplay](#)
- [SkinTemplateNavigation](#)

Layout: Title area

Contents

1	Structure of the title area	4
2	Breadcrumb navigation	4
3	Quicklinks	4
4	Category assignment	5
5	Page title	6
6	Revision status	7
7	Watch status	7
8	QM status	8

Structure of the title area

In the title area of an article, the most important page information and functions are bundled for easy access:

- **Page navigation (a):** Breadcrumb navigation (1), Quicklinks (2)
- Category assignment (3)
- Page title (4)
- **Status bar (b):** Revision status (5), Watch status (6), QM status (7)

Breadcrumb navigation

Using the breadcrumb navigation(1), you can access parent and child pages of the current page.

If a page in the general namespace "Pages" is called, for example, "BlueSpice Helpdesk/System Requirements", the following three links are displayed as breadcrumbs: *(Pages): BlueSpice Helpdesk > System Requirements >*

The arrow at the end of the breadcrumb navigation indicates that a subpage exists for the System Requirements page. With a click on the last arrow you can navigate directly to the subpages:

All connection arrows in the breadcrumb are active and open an overview of all directly subordinate pages when clicked.

Quicklinks

In the **Page navigation** you can also directly access the version history and related pages by clicking on the arrow next to the "Page" function (2). In addition, there is also the quicklink "Discussion", which leads to the discussion page of the current page.

Category assignment

In the category assignment, you can see the categories with which the page is associated. If you move the mouse over the categories or the text "no categories", the "edit" link becomes visible for users with write access: **rand**

Clicking on the "edit" link or on the category symbol makes it possible to assign new categories to the page:

If you enter a keyword in the text field (1), suggestions for existing categories are automatically displayed as you type:

If no matching category is found, you can also select one or more categories using the flat category directory (2) or the hierarchical category tree (3).

If you do not want to save a category, close the input menu with the "x" (4).

If you want to save the selected categories, click on the check mark (5). The categories are now displayed on the page. The category names are linked directly to the category pages:

Page title

The page name is displayed on the page as page title by default. However, the title can be overridden using VisualEditor. Click on the "Hamburger" menu (1) and select "Advanced Settings":

In the dialog window "Options>Advanced Settings", enter the new display title (2):

The screenshot shows the 'Advanced settings' dialog box in BlueSpice. The left sidebar has a list of settings: Categories, Page settings, Advanced settings (selected), Languages, and Templates used. The main area is titled 'Options' and contains several settings:

- Advanced settings** (gear icon)
- Let this page be indexed by search engines** (info icon): Radio buttons for Yes, Default (selected), and No.
- Show a tab on this page to add a new section** (info icon): Radio buttons for Yes, Default (selected), and No.
- Display title** (info icon): A text input field containing 'System requirements 3.1'.
- Title visibility** (info icon): Radio buttons for Show (selected) and Hide.

After saving the page, the new display title appears on the page.

In the source code a "displaytitle" tag has been added:

```
{{DISPLAYTITLE:System requirements 3.1}}
```

Revision status

In the **status bar** you can find the most important information about the page: *who* made *which* page changes and *when*:

The screenshot shows a status bar with an information icon (i) and the text: Last edited 22 hours ago by TechWriter

The time stamp leads directly to the visual comparison of the last two page versions. The user name leads to the user profile of the person who last edited the page.

Watch status

Another useful feature in the **status bar** is the watch function. Clicking on this link adds the article to your personal watchlist:

Accordingly, you can remove the page from the watch list using the same link.

See also: [Extension/BlueSpiceWatchList](#).

QM status

By displaying the current quality status of the page, you can directly display the quality management page tools. Simply click on the status indicator symbol:

The Quality Management section contains important information, such as page assignments, reminders, or the review status of the current page.

For further information, see [Information about quality management](#).

Assign categories

A [quality version](#) of this page, [approved](#) on *30 July 2020*, was based off this revision.

InsertCategory enables viewing and editing category assignments for a page.

Assigning categories

Title section

Categories can be assigned to a page directly from the title section in view mode. Any user with edit rights can click on the *tag*-icon above the page title to edit the category assignments.

Page information flyout

The page categories can also be managed from the *Page information* flyout in the [quality management tools](#).

To add or remove categories, hover over the this section and click the *edit* button.

Possible actions:

- *Save*: Saves the categories in the input field.
- *Cancel*: Closes the category field without making any changes.
- *Remove all*: Removes all assigned categories from the page.

File upload dialog

Categories can be assigned to a file during the file upload. If more files are uploaded simultaneously, the same categories will be applied to all files. Select the categories using the arrow icon or the icon for the hierarchical category tree.

Category manager

To manage categories on the wiki level, use the [Category manager](#) page.

Source editing

You can also add to [add categories directly in source editing mode](#).

Configuration

In the [Config manager](#), you can change the following settings:

- [Insert category with its parents](#)
- [Set page categories as default in upload dialog](#)
