Features

The extension **NamespaceCSS** allows users to use different CSS styles for different namespaces. This can be useful if you want to visually distinguish between different manuals or parts of your wiki.

It is possible to change the look of the wiki at the namespace level.

The CSS code is written to the contents of the `<namespace name>_css` page. The extension checks at each page call whether there is a CSS page for this namespace. This is then registered as a StyleSheet.

Example: *MediaWiki:User_css* affects all pages that are in the namespace *User*.

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31
BlueSpiceFoundation: 3.2

Integrates into

Special pages
