Features

BlueSpiceSocial is a group of extensions that add social media features to the wiki. This allows users to quickly communicate on the wiki and to express their opinions on pages more easily.

Warning: Pages in the namespaces *SocialEntity* and *User* are indexed by search engines by default until prior to version 3.1.13. If you run a public wiki with an earlier version, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

BlueSpiceSocial provides the architecture for all *Social* extensions. It contains base classes, SourceTitle namespace, SocialEntity ContentModel, notifications, etc.

This extension is required by all *Social* extensions. Without another *Social* extension (e.g., BlueSpiceSocialBlog), this extension has no effect.

The following *Social* extensions are available:
