View help page			

Features

BlueSpiceSocialBlog provides the SocialEntity type *blog*.

Warning: Pages in the namespaces *SocialEntity* and *User* are indexed by search engines by default until version 3.1.13. If you run a public wiki with an earlier version, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

The extension BlueSpiceSocialBlog is the basis for the *Special:Blog* page. In every new wiki installation, this page is linked directly from the main navigation. Customized blog views can be added to a wiki page using the `<bs: timeline />` tag.
