## Features

**SocialResolve** provides the unresolved/resolved status for SocialEntities. By default, the status functionality is attached to entities of type *topic* (discussion entries).

**Warning:** Pages in the namespaces *SocialEntity* and *User* are indexed by search engines by default until prior to version 3.1.13. If you run a public wiki with an earlier version, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

This extension adds a button to the social entity topic. Clicking it toggles the unresolved/resolved state of the topic. Closed social entities have a green background by default and their view type is changed to "Short". It is not possible to use this extension for social entities of type *profile*.
