Extension\ NSFileRepo

Overview			
Description:	implements per-namespace group permissions for image and file rights protection.		
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL v2+
Type:	BlueSpice	Category:	Document Management
Edition:	BlueSpice pro, BlueSpice Farm, BlueSpice Cloud		
View help page			

Features

NSFileRepo enables uploading files to namespaces. The extension restricts access to upload and read files and images to a given set of user groups associated with the protected namespaces.

Usage / features

Using this extension (within the security limitations noted above), you can protect not only pages and areas of your wiki, but also any uploaded images or files within those namespaces. Use the same syntax as a normal file reference link, adding the namespace between the file specified ("File", "Image" or "Media") and the file name.

Technical information

Configuration

[Image Authorization](#) must be configured properly.

Rights (permissions)

This extension does not require any special rights. If users will be allowed to access files in a particular namespace depends on the "read" permission for that namespace.

Requirements

NSFileRepo requires [BlueSpiceFoundation](#).

More info

For detailed description and usage, visit our [help page](#).

Technical details on how this extension works can be found on [MediaWiki](#).

Demo

Try out associating files such as images with namespaces in our [BlueSpiceDemo](#).

Files in namespaces

A [quality version](#) of this page, [approved](#) on *10 July 2020*, was based off this revision.

NSFileRepo enables uploading files to namespaces. The extension restricts access to upload and read files and images to a given set of user groups associated with the protected namespaces.

Associating files with namespaces

Files are uploaded to the File namespace (NS_FILE), but contain an additional namespace reference:

```
[[{FILE_NS}:{Namespace}:{Filename}]]
```

For example, a file can be uploaded to the namespace *Private*. where access to that namespace can be restricted to particular user groups:

```
[[File:Private:Filename.jpg]]
```

The namespace for a file can be provided in the upload dialog. By default, the namespace of the wiki page is provided, if you upload a file directly during page editing.

Extension\: BlueSpiceFoundation

Overview	
Description:	Makes MediaWiki enterprise ready

Overview			
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL-3.0-onlyProperty "BSExtensionInfoLicense" (as page type) with input value " GPL-3.0-only" contains invalid characters or is incomplete and therefore can cause unexpected results during a query or annotation process.
Type:	BlueSpice	Category:	Infrastructure
Edition:	BlueSpice free, BlueSpice pro, BlueSpice Farm, BlueSpice Cloud		

Features

The extension **BlueSpiceFoundation** is the interface between BlueSpice and Mediawiki. It provides basic functions for the individual BlueSpice extensions.

If you install any BlueSpice extension in a MediaWiki environment - that is outside of BlueSpice free or BlueSpice pro - the reference information for the extension will indicate if it requires BlueSpiceFoundation.

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31
ExtJSBase: 1.31

Integrates into

- BlueSpicePrivacy

Special pages

- SpecialCredits
- WikiAdmin
