## Reference: NSFileRepo

### Extension\[: NSFileRepo

Overview			
Description:	implements per-namespace group permissions for image and file rights protection.		
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	<a href="#">GPL v2+</a>
Type:	<a href="#">BlueSpice</a>	Category:	Document Management
Edition:	BlueSpice pro, BlueSpice Farm, BlueSpice Cloud		
<a href="#">View help page</a>			

## Features

**NSFileRepo** enables uploading files to namespaces. The extension restricts access to upload and read files and images to a given set of user groups associated with the protected namespaces.

## Usage / features

Using this extension (within the security limitations noted above), you can protect not only pages and areas of your wiki, but also any uploaded images or files within those namespaces. Use the same syntax as a normal file reference link, adding the namespace between the file specified ("File", "Image" or "Media") and the file name.

## Technical information

### Configuration

[Image Authorization](#) must be configured properly.

### Rights (permissions)

This extension does not require any special rights. If users will be allowed to access files in a particular namespace depends on the "read" permission for that namespace.

## Requirements

NSFileRepo requires [BlueSpiceFoundation](#).

## More info

---

For detailed description and usage, visit our [help page](#).

Technical details on how this extension works can be found on [MediaWiki](#).

## Demo

---

Try out associating files such as images with namespaces in our [BlueSpiceDemo](#).
