Features

ReadConfirmation asks for confirmation that a page has been read by users who have a [page assignment](#) for that page.

When the feature is enabled for a namespace, users who are assigned to a page see a checkbox at the top of the page. By clicking the checkbox, they confirm that the page has been read.

ReadConfirmations can be enabled or disabled for each namespace individually, in [NamespaceManager](#).

Page approval and read confirmation

If a namespace has the feature [Approval](#) activated at the same time, the read confirmation is triggered if a new draft page has been created. This can be changed server-side using LocalSettings.php. If a read confirmation should be triggered after the page has been approved and not when the draft is created, the following setting needs to exist:

```
$GLOBALS['bsgReadConfirmationMechanism'] =  
"\\BlueSpice\\FlaggedRevsConnector\\ReadConfirmation\\Mechanism\\PageApproved::  
factory";
```

Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

Requirements

MediaWiki: 1.31
BlueSpiceFoundation: 3.2

Integrates into

- BlueSpicePrivacy

Special pages

Permissions

Name	Description	Role
readconfirmationremind	Remind users that they have to confirm to have read the page	admin, maintenanceadmin

Configuration

Name	Value
Mechanism	'BlueSpice\\ReadConfirmation\\Mechanism\\NonMinorEdit::factory'
