Contents

1 Installing MariaDB	2
2 Create database user for BlueSpice	2
3 Next Step	2

BlueSpice stores your content in a database for which you need to install a corresponding server. The steps listed here are required.

Installing MariaDB

Install MariaDB via Aptitude:

```
apt update; \  
apt install mariadb-server mariadb-client; \  
apt clean
```

Create database user for BlueSpice

After installation, immediately create a database user for MariaDB directly with the following command:

```
mysql -e "GRANT ALL ON bluespice.* TO 'bluespice'@'127.0.0.1' IDENTIFIED BY '<ein  
Passwort Ihrer Wahl>';"
```

Next Step

If you have completed all steps successfully, you can proceed to the next step "[Jetty](#)".
