

Skins

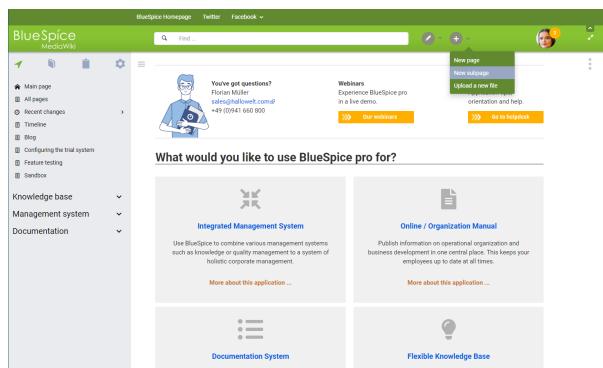

Click on an image to enlarge it. Click on the associated "CSS Code" link to see the code for the skin variation. You can download the matching BlueSpice logos here: [white](#), [grey](#), [duotone](#). You can integrate the logo using the [Config manager](#) (extension *BlueSpiceFoundation*) after uploading the logo to your wiki.

Duo\-tone

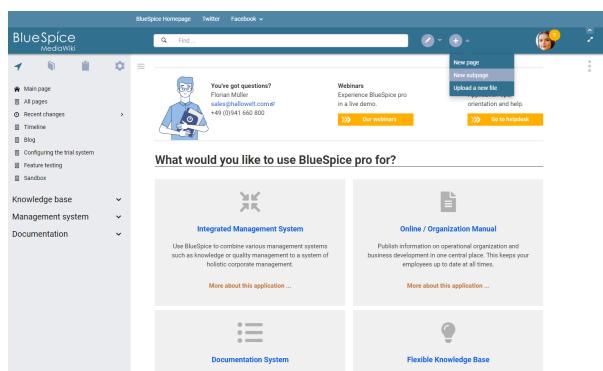

The duo-tone is created by harmoniously matching the colors of both top bars.

The screenshot shows the BlueSpice MediaWiki homepage. The header is red with the title "BlueSpice MediaWiki". On the right side of the header, there is a "Custom menu" icon. A dropdown menu is open, showing options like "New page", "New subpage", and "Upload a new file". Below the header, there is a sidebar with links for "Main page", "All pages", "Recent changes", "Timeline", "Shop", "Configuring the trial system", "Feature testing", and "Sandbox". The main content area features a section titled "What would you like to use BlueSpice pro for?" with four cards: "Integrated Management System", "Online / Organization Manual", "Documentation System", and "Flexible Knowledge Base". Each card has a small icon and a brief description.

[CSS Code](#)

This screenshot shows the same homepage as the previous one, but with a blue header bar instead of red. The rest of the interface, including the sidebar and the main content area, remains identical.

[CSS Code](#)

This screenshot shows the same homepage with a yellow header bar. The overall look is slightly different due to the color change, but the content and layout remain the same as the other variations.

Accent color in Custom menu

This skin variation adjusts the color of the thin collapsible custom menu at the top of the page.

This screenshot shows the homepage with a yellow header bar. The custom menu is styled differently, appearing as a thin, horizontal bar with a dark grey background and white text. It contains the same options as the previous variations: "New page", "New subpage", and "Upload a new file". The sidebar and main content area are also visible.

[CSS Code](#)

The screenshot shows the BlueSpice MediaWiki homepage. The navigation menu on the left includes links for Main page, All pages, Recent changes, Timeline, Blog, Configuring the trial system, Feature testing, and Sandbox. Under Knowledge base, Management system, and Documentation, there are dropdown menus. The main content area features a grid of icons representing company philosophy, processes, and competencies. A sidebar on the right contains news items and important documents.

[CSS Code](#)

This screenshot shows the same homepage as above, but with a dark red navigation bar. The overall color scheme is darker, including the sidebar and the main content area.

[CSS Code](#)

Color variation in Navigation menu

The effect of this skin-variation is achieved by coloring the navigation menu.

The screenshot shows a Knowledge Base page. The navigation menu on the left is light blue. The main content area features a diagram illustrating 'Dynamically connected knowledge' and a section on 'Knowledge Management ISO 9001'.

[CSS Code](#)

This screenshot shows the same Knowledge Base page as above, but with a dark red navigation bar. The overall color scheme is darker, including the sidebar and the main content area.
