## Template:Embed video

Embeds a single external video on the page.

Template parameters

| Parameter                                                           |                          | Description                                                                                                                                                                                                                           | Type    | Status   |
|---------------------------------------------------------------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|----------|
| <b>Hosting type</b>                                                 | <code>hostingtype</code> | <p>Indicates if the video is stored on the wiki or on a video streaming service.</p> <p><b>Default</b><br/>external</p> <p><b>Example</b><br/>external, wiki</p> <p><b>Auto value</b><br/><code>external</code></p>                   | Unknown | required |
| <b>Service</b>                                                      | <code>service</code>     | <p>Name of the video service (supported services only). For local videos use wiki</p> <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>youtube, wiki, vimeo, ted, facebook</p> <p><b>Auto value</b><br/><code>youtube</code></p> | Unknown | required |
| <b>URL of the external video or file name of the internal video</b> | <code>videopath</code>   | <p>Path to the video</p> <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>empty</p> <p><b>Auto value</b><br/><code></code></p>                                                                                                   | Unknown | required |
| <b>Dimensions</b>                                                   | <code>dimensions</code>  | <p>Dimensions in pixelsto size the container for the player.</p> <p><b>Default</b><br/>640</p> <p><b>Example</b><br/>480, 480x320</p> <p><b>Auto value</b><br/>empty</p>                                                              | Unknown | optional |

| Parameter   |                        | Description                                                                                                                                                                                                                                                                                                  | Type    | Status   |
|-------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|----------|
| Alignment   | <div>alignment</div>   | <p>The video can be placed left, center, right, or inline. Inline allows to add multiple videos in one row. In mobile view, the videos are automatically aligned vertically.</p> <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>left, center, right, or inline</p> <p><b>Auto value</b><br/>empty</p> | Unknown | optional |
| Description | <div>description</div> | <p>Shows a description below the player container.</p> <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>Departure to Mars</p> <p><b>Auto value</b><br/>empty</p>                                                                                                                                        | Unknown | optional |
| Container   | <div>container</div>   | <p>Determines the container type for the player. The value frame places the video player in a Mediawiki preview box.</p> <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>frame</p> <p><b>Auto value</b><br/>empty</p>                                                                                  | Unknown | optional |
| Autoresize  | <div>autoresize</div>  | <p>Automatically adjusts the video size if the video would extend beyond the size of the container.</p> <p><b>Default</b><br/>true</p> <p><b>Example</b><br/>true, false</p> <p><b>Auto value</b><br/>empty</p>                                                                                              | Unknown | optional |

| Parameter          |                         | Description                                                                                                                                                                        | Type    | Status   |
|--------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|----------|
| Vertical alignment |                         | Aligns the vertical placement of the video either to the top, middle, bottom, or baseline of the parent element. Using this parameter forces the alignment parameter to be inline. | Unknown | optional |
|                    | <code>valignment</code> | <p><b>Default</b><br/>empty</p> <p><b>Example</b><br/>top, middle, bottom, baseline</p> <p><b>Auto value</b><br/>empty</p>                                                         |         |          |
