## Template:Subpages

This template lists all subpages of a wiki page. The result is displayed as a bulleted list and can be set to 1-3 columns.

The template file (*Template:Subpages*) can be downloaded as part of the [template package](#).

The following parameters can be set in visual editing mode:

### Template parameters

Parameter	Description	Type	Status
<b>Namespace</b> <code>parentnamespace</code>	<p>Leave blank for the Main namespace</p> <p><b>Default</b> empty</p> <p><b>Example</b> empty</p> <p><b>Auto value</b> empty</p>	Unknown	optional
