Templates download/ButtonLink

This template creates a link that is styled as a button. It can be inserted into a wiki page via the VisualEditor *Insert > Template* menu.

Importing the template

The import file is included in the archive file *HW-ButtonLink.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-ButtonLink.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

The template is now available in your wiki.

Important! The input fields for the template parameters are usually not automatically available after importing the template to your wiki. You have to open the imported template file and make an edit (e.g., add a space and then save the page) to activate the template data functionality. The input fields should now be displayed correctly when you use the template on a page.

Pages included in the import

The xml import creates the following files in your wiki:

- Template:ButtonLink

Using the template

1. Add the template from the [VisualEditor](#) insert-dialog.
2. Fill in the form fields as needed.

Cancel

ButtonLink

Apply changes

There might be some additional information about the "ButtonLink" template on its page.

What is VisualEditor?

The visual editor is optimized for editing wiki pages. Important characteristics and functions are:

1. **Page structuring** with headings.
2. Consistent **text formatting**.
3. **Linking** of contents.
4. **Inserting special content** (files/media, tables, templates, magic words)
5. Adjusting **page options**.

Text editing

Typical text formatting options such as **bold**, *italics*, or **text color** are available as a context menu. When you highlight text, a menu with common formatting elements appears. For example, you can apply a different text color.

Pasting content from your clipboard (ctrl+shift+v)

If you paste content from your clipboard (e.g., copied from MS Word or MS Excel), you usually also paste many unnecessary formatting tags from the original application. To avoid, this you should paste the content as plaintext.

If you already pasted text which resulted in undesirable formatting, you can use the undo function in VisualEditor to remove the content again if you have not yet saved the page or switched between visual and source editing mode.

To paste content as plain text instead, use the shortcut **ctrl+shift+v**.

Shortcuts

If you want to apply multiple formatting options at the same time, shortcuts are often the quickest way. For example, to show text in bold and italic, highlight the text and press *Ctrl+b* (for "**bold**") and *Ctrl+i* (for "*italics*"). Even a link can be quickly inserted by pressing *Ctrl+k*. Pressing *Ctrl+b* again will cancel the bold. Multiple formats can be removed after text selection with *Ctrl+m*.

All available keyboard shortcuts are marked accordingly in VisualEditor next to each menu item.

Note: For a list of all available shortcuts, click on "Keyboard shortcuts" in the Visual Editor help menu (the question mark menu item).

Inserting other content

Many typical page elements such as images, files and tables can be integrated into your page from the *Insert* menu.

- File formats with a preview option: jpg/jpeg, png, gif, pdf
- File formats without preview option are always inserted as links (e.g., Microsoft Office formats)
- Files can be connected with namespaces and categories

If you want to learn more about inserting these elements, go to the following help pages:

- [Images](#)
- [Files \(PDF, xls, doc, ...\)](#)
- [Tables](#)
- [Templates](#)

Wiki-specific content

Some functions in the "Insert" menu are little known from traditional word processing, but are quite typical for working with a wiki. Therefore, they are briefly introduced here. Find more information on the help pages here in the helpdesk or at mediawiki.org:

- **Comment:** Add comments to the page. These are only visible in the source code.
- **Gallery:** A simple picture gallery can support many process flows.
- **Magic word:** Wiki features such as signature, word counter, category tree or even process diagrams with draw.io can be integrated as a "magic word".
- **Your signature:** Only works on pages that allow signatures. Pages in the Namespace "Pages" are not included.
- **Codeblock:** Programming code is displayed here in clean code blocks, optionally with line numbers.
- **References list:**
- **Chemical formula:** The formula rendering uses an external service via Wikimedia's REST API.
- **Math formula:** An editor opens for entering a mathematical formula.

Switching between edit modes

When creating or editing a page, the page loads in visual editing mode. If you are familiar with the code language of MediaWiki ("Wikitext"), you can easily switch to source editing mode using the "Switch editor" button:

MediaWiki reference

Since VisualEditor is a standard MediaWiki extension, you can also read a [documentation of functionality on MediaWiki](#). Here in the BlueSpice Helpdesk, we only give some hints and tips for using the editor.

Hints and tips

VisualEditor is optimized for editing web pages. That's why it has exactly the features that are often needed to create a wiki page. The consistent formatting of content supports the readability of your wiki content.

Text formatting

Text formatting	
Undo function	

Text formatting	
	Left arrow: Undo last action (greyed out: there is no last action yet) Right arrow: Restore last action (greyed out: there's nothing to restore yet)
Format Paragraph 	Here text can be defined as heading or specific paragraph type. <i>Note:</i> If you work in a table , the options will change accordingly (content cell and header cell): 
Style text 	If no text has been selected before clicking on the "A" button and on a button, the text will be formatted from the current position of the cursor. (More Info at mediawiki.org/wiki/Help:VisualEditor/User_guide/en#Getting_Started:_The_VisualEditor-Toolbar)
Insert hyperlink 	If no text was selected before the hyperlink dialog was opened, the link will be generated with a number: [1] To subsequently change the hyperlink description, just click on the link to open the edit menu. In a table, you may need to double-click the cell first and then click the hyperlink again.
cite 	The citation menu is used to insert references (also called itemizations or footnotes) within the text.
Structure 	

Insert special content

Paste Special Content	
Insert menu 	Use the "insert" menu to insert various media (images, videos) and text formats:
media	Inserting pictures and videos

Paste Special Content	
 Media	(Details on MediaWiki)
templates	
 Template	Include a template in the page.
tables	
 Table	Tables are an important tool for formatting tabular page content.
comment	Comments are not visible to readers, but only in edit mode. A comment can be inserted anywhere on a page. The comment can be edited by clicking on it.
 Comment	 Discuss content with... And this is what a comment looks like:
Gallery	
 Gallery	
Magic word	With a "magic word" you can include certain variables or so-called behavioral switches in your page. For example, you can display the word count: Learn more about the function Magic Word . Overview of all Magic Words in the visual editor .
 </> Magic word	
Your signature	This option can only be used in discussions. It allows to add a signature at any point of a discussion.
 Your signature	
Code block	With code block various code examples can be entered, like e.g. in HTML syntax. The code is then displayed properly formatted: <code>red text</code>
 Code block	
Refernces list	
 References list	

Paste Special Content	
Chemical formula  Chemical formula	The formula rendering uses an external service via Wikimedia's REST API.
Math formula  Math formula	It opens an editor for entering a mathematical formula. [info on MediaWiki]
Special Characters 	

Page options

Page Options	
 Options menu	The options menu allows editing of all page settings.
Options  Options	This button allows the page settings and page information to be updated simultaneously within a dialog box.
Categories  Categories	Here you assign the page to one or more categories Categories. The page will appear accordingly on all linked category pages.
Page Settings  Page settings	Page redirection: When the page is redirected, the content of the page is no longer displayed, but the target page is loaded directly. This setting can also be used to display or remove the table of contents at the top of the page. The table of contents is automatically generated by the headings on the page. When a page has more than three headings, the table of contents appears automatically by default.
Advanced Settings  Advanced settings	
Languages	

Page Options	
 Languages	
Templates used  Templates used	
View as right-to-left  View as right-to-left Ctrl+Shift+X	Support for languages that are read from right to left. Clicking this button right-side formats the page text. Click again to set the text flush left.
Find and replace  Find and replace Ctrl+F	Words or characters can be searched and replaced directly on the page. The "Undo" button can be used to cancel the change.

Troubleshooting: Visual editing is disabled

If you only see code editing, please contact an administrator of your wiki. The following settings must be checked in this case:

- Global settings via the configuration manager
- Namespace management settings
- Parsoid service on the server
